DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-4, drawn to method of joining plate-shaped objects and classified in class 29, subclass 432.

Group II, claims 5-7, drawn to apparatus for joining plate-shaped objects and classified in class 29, subclass 798.

Group III, claims 8 and 10, drawn to a rivet and classified in class 411, subclass 501.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The method, apparatus for making, and rivet could all be used in separate inventions and are not specially designed for only being used with each other. The rivet could be used in any method for joining objects and with any type of forming die.
3. A telephone call was made to Jacqueline Steady on April 1, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3679

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
